HORDES OF MODELS AND BUCKETS OF DICE – PROELIUM - QRS

Artillery shooting at long range

Smooth bore artillery, artillery that throws stones or fires bolts only throw a maximum of 2 dice to hit and can only inflict a maximum of 1 hit if 1R in total per shooting action point before the shooting response is applied, or a maximum of 2 hits if 2R in total per shooting action point before the shooting response is applied.

Mortar or rocket artillery only throw a maximum of 2 dice to hit and can only inflict a maximum of 2 hits in total per shooting action point.

Rifled bore artillery only throw a maximum of 3 dice to hit. And may only score a maximum of 2 hits in total per shooting action point.

Artillery shooting at short range

Smooth bore artillery only throw a maximum of 4 dice to hit.

Rifled bore artillery and artillery that shoots bolts only throw a maximum of 3 dice to hit.

Artillery that throws a stone or ball cannot shoot at short range.

Mortar and rocket artillery cannot shoot at targets at short range.

Bounce through rules do not count for gunpowder smooth bore artillery at short range.

Bounce through from artillery shot/stones/bolts

Measure a line from the center of the formation to the center of the target formation and extend through and beyond the target formation.

Throw 1d3. This is the number of MU the shot has bounced along this line, measured from the front edge.

If this contacts any base of any other formation (friendly or enemy) then that unit immediately receives a single hit and only a single hit. This hit cannot not be mitigated and must be applied to the formation and resolved straight away.

Artillery in contact with any enemy formation

Throw only 2 dice in all cases.
